InBCA

WHO WE ARE

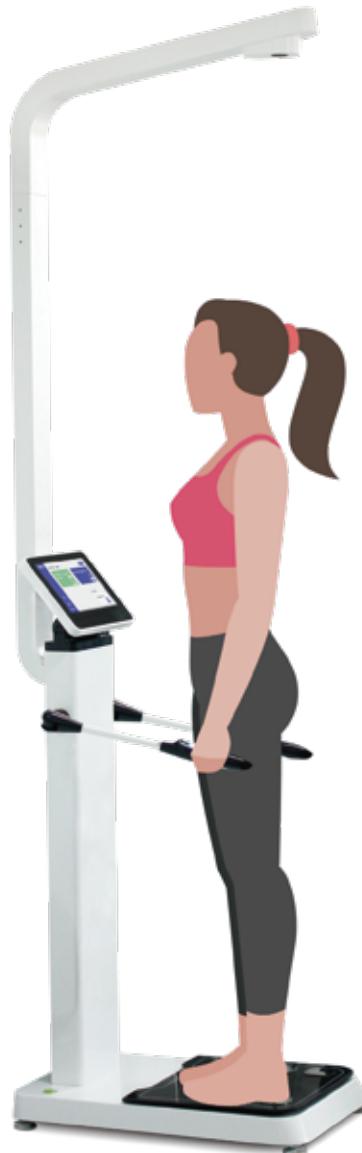

As a national high-tech enterprise, InBCA Medical Corp. commits to developing and manufacturing medical examination device solutions, and strives to become the best provider of comprehensive chronic disease and health management solutions in China. InBCA has developed more than 12 products with independent intellectual property rights, these products are widely applied in hospitals, communities, gyms, and healthcare centers.

InBCA

Body Composition Analyzer

DSM-BIA professional human body composition analyzer, more than 50 sets of testing data to build a human data model, advanced IOT intelligent technology and IAP remote gateway technology, to meet various applications of Internet smart devices, with membership system and visitor Face recognition system, IC card and other usage system, easily and widely used in other

DSM-BIA Technology

Application:

Hospital , physical examination center, community workstation, health care center,Gym , Beauty slimming.

Model	IN-F500	
Test Range	Gender: Male / Female	
	Age range : 18-99 years old	
	Temperature: 10-40°C	
	Humidity 10-85 %	
Login Method	Face recognition, IC card, mobile phone and other login methods	
	Optional ID card login method, it can be used with consumer systems	
Display	Led 300 nit	10.1 inch, Resolution:1280*800
Height (Optional)	Measurement method:	Industrial grade ultrasonic measurement (including temperature compensation)
	Test Range	Height:70~200cm,
	Measurement accuracy	±0.1cm
weight	Measurement method:	Parallel beam type weighing sensor
	Measuring range:	weight:0.1~400Kg
	Maximum weight:	Less than 500Kg
	Measurement accuracy:	±0.1Kg
Fat measurement	Measuring system	8 electrodes
	Measuring frequency	5kHz/50kHz/250kHz/500kHz/1000kHz
	Analysis Project	Body fat percentage, body fat mass, muscle mass, muscle percentage, body water percentage, body water content, protein, inorganic salt, intracellular fluid, extracellular fluid, BMI, basal metabolism, visceral fat level, skeletal muscle, body segment muscle mass, body segment fat mass, etc.
	Other projects	body segment impedance measurement with 5 frequency, body age evaluation, measurement evaluation, weight control, fat control, muscle control, etc.
	Material	Plating materials
	Measuring current	below 90µA
	Resistance	75.0 ~ 1,500.00Ω(0.1ΩUnit)
	Measuring parts	Trunk, right leg, left leg, right arm, left arm
	Data transmission	RJ45,WIFI
	API	provided
OEM/ODM	Yes	
Voltage	110-240V , 50-60HZ	
Rated power	< 60W	
Packing size	Carton: Outer box dimensions (length, width and height): 130*60*34cm, net weight: 39kg, gross weight: 50kg Wooden box: Outer box dimensions (length, width and height): 70*36.5*145, net weight: 39kg, gross weight: 70kg	

Human Body Composition Analysis Report

⑬ Expert's comments

Professional Height & Weight Physical Examination

User friendly interface and intelligent voice guidance lets you easily take the INBCA test and analyze results. Provide customized consultation with the segmental circumference, segmental lean analysis and segmental fat analysis. You can also check with what kind of body type with INBCA IN-F100, which is determined by BMI and body fat. Understanding your body type will help you make a better diet and exercise plan, and set realistic, achievable, goals that pave the way to your success.

Intelligent Integration Of Chronic Disease Management Platform

Items

	Height		weight		BMI		Body Temperature
	Blood pressure		Body Composition Analysis		Blood oxygen		

Features

	All-in-one machine design, various physical examinations are completed in one stop		Multiple login methods
	Quickly and easily establish personal health electronic records		Simple operation and immediate printing of physical examination report
	Powerful Internet function to effectively prevent chronic diseases		The machine can count the number of member measurements and the number of visitor measurements

Application:

Hospitals, social health service stations, physical examination centers, smart elderly care, health management institutions, pharmacies and pharmaceutical companies, insurance, fitness center.

Model IN-I2		
Height	Hardware module model	INBCA Hardware motherboard + sensor
	Measuring system	Ultrasonic sensor (including high-precision temperature difference compensation sensor)
	Measuring range	Height:70~210cm
	Measurement accuracy	±0.1cm
weight	Hardware module mode	INBCA Hardware motherboard + sensor
	Measuring system	Precision balance beam pressure sensor
	Measuring range	1~500kg
	Measurement accuracy	±0.1Kg
Body composition analysis	Measuring system	DSM-BIA (Direct Segmental Multi-frequency Bioelectrical Impedance Analysis)
	Measuring range	50KHz/100KHz
	Measuring current	Below 90µA
	Electrode material	Plated metal material
Blood pressure	Measuring part	Trunk / Right arm / Left arm / Right leg / Left leg
	Measuring range	50.0 Ω ~ 1200.0 Ω
	Measuring system	Oscillometric method + Korotkoff sound method
	Measuring range	0mmHg~295mmHg, (40~199) times/min
Blood oxygen	Measurement accuracy	Pressure: ±3mmHg (±0.4kPa), pulse rate: 5%
	Applicable arm circumference	24cm-42cm
	Measuring system	Dual wavelength light emitting diode
	Measuring range	35%~100%
Packing size	Measurement error	Within the range of 70%~100%, the measurement error is ±2% (is pulse oxygen saturation and percentage)
	Measurement accuracy	Less than 3% within the measurement range of 70%~100%
	Carton: Outer box dimensions (length, width and height): 46*137*27, net weight: 23kg, gross weight: 24kg	
	Wooden box: Outer box dimensions (length, width and height): 168*65*62cm, net weight: 65kg, gross weight: 85kg

Product Function Display

Model	IN – E2	
Body Temperature Measurement	Operating environment temperature	10~40° C
	Storage temperature	0~50° C
	Relative humidity	≤85%
	Human body temperature measurement mode	32.0~42.5° C
	Environmental temperature measurement mode	0~100C
	Accuracy	±0.3° C
	Power consumption	≤120mw
	Measuring distance	5 to 8 cm
	Automatic shutdown	about 15 seconds
Blood Pressure Measurement	Measuring range	Pressure (0~300)mmHg[(0~40)kPa] pulse rate 30 times/min ~200 times/min
	Measurement accuracy	Pressure: Within ± 2mmHg (+0.267kPa) Pulse rate: within ± 2%
	Detection method	pulse wave method
	Applicable circumference range of cuff	17cm ~ 42cm
Height and Weight Measurement IN-H1 (optional)	Height measurement	ultrasonic probe
	Weight measurement	Parallel beam load cell
	Height measurement range	50~200cm
	Weight measurement range	1~300KG
CPU	High-performance quad-core application processor platform, Cortex-A17, CPU: Mail-T764	
Main frequency	1.6G Hz	
Memory	DDR3 1G	
Built-in storage capacity	NAND FLASH 8GB , The system occupies part of the storage space, the actual capacity is about 12GB	
Network	10/100M adaptive Ethernet RJ45 network port, support 2G WIFI, support IEEE 802.11 b/g/n	
Display screen	10.1-inch capacitive LCD touch screen, surface chemically strengthened glass, hardness: 6H, resolution: 1280*800	
Identification	ID cards can be selected according to user needs: second-generation resident ID card recognition, face recognition (not 3D face recognition), barcode, RFID and other identification methods	
Printing method	The equipment has a built-in 58mm thermal microprinter (need to be customized) to print basic data	
Data upload method	Can connect to HIS system or network platform through RJ45 or WIFI, upload data to designated server	
Input power	AC100~240V 50~60HZ	
Rated power	<60VA

Body fat measurement	Automatic shut-down	About 15 seconds
	Measurement items	Body fat percentage, body fat mass, muscle mass, body water percentage, body water content, visceral fat grade, lean body weight, ideal body weight, inorganic salt, protein, basal metabolic rate and other parameters
	Measurement method	Multi-frequency four-electrode/whole body impedance measurement method
		Impedance measurement 50KHz 、 100KHz frequency
Blood pressure measurement	Human body impedance output	Support printing human body impedance value
	Measuring range	Pressure (0 ~ 270)mmHg [(0 ~ 36)kpa] Pulse rate 40 times/minute ~ 180 times/minute
	Measurement accuracy	Pressure: within ± 3mmHg (± 0.4kpa) Pulse rate: within ± 5%
	Storage capacity	Can store 50 groups of measurement data for 2 users
Blood oxygen measurement	Blood pressure cuff size	17cm ~ 42cm
	Sensor	Dual wavelength light emitting diode
	Wavelength	Red light: 663nm Infrared light: 890nm
	Measuring range	35% ~ 100%
	Maximum average optical output power	≤2mW
	Measurement error	In the range of 70% ~ 100%, the measurement accuracy is ± 2% (% is the percentage of pulse oxygen saturation)
Accuracy		In the range of 70%–100% <2%
Pulse rate measurement error		30 ~ 250bpm The monitoring error is ± 2bpm or ± %2, whichever is the largest
Operating temperature		5°C ~ 40°C
Relative humidity		15% ~ 95% (non-condensing)
Atmospheric pressure		70kpa ~ 106kpa
CPU		High-performance quad-core application processor platform, Cortex-A17, CPU: Mail-T764
Main frequency		1.6G Hz
RAM		DDR3 2G
Built-in storage capacity		NAND FLASH 16GB, the system occupies some storage space, the actual capacity is about 12GB
Internet		10/100M adaptive Ethernet RJ45 network port Support 2.4GWIFI, support IEEE 802.11 b/g/n
Display screen		10.1 inch capacitive LCD touch screen, surface chemically strengthened glass, hardness: 6H, resolution: 1280*800
Identification		ID card can be selected according to user needs: second-generation resident ID card recognition, face recognition (non-3D face recognition), barcode, RFID and other identification methods
Printing method		The device has a built-in 57mm thermal microprinter (need to be customized) to print basic data, and can be directly connected to a designated A4 printer to print the medical report.
Data upload method		Can connect to HIS system or network platform via RJ45 or WIFI, upload data to designated server
Input power		AC 100 ~ 240V 50 ~ 60Hz
Rated power		<60VA
Electric shock protection		Class I Type B equipment
Using environment temperature and humidity		+5°C ~ +40°C 15%RH ~ 85%RH
Storage environment temperature and humidity		-20°C ~ +60°C 10%RH ~ 95RH
Packing size		Wooden box: Outer box dimensions (length, width and height): 75*60*60cm, net weight: 20kg, gross weight: 58kg

InBCA

Intelligent Health Examination Kiosk

Items

Height	weight	Blood pressure	Four items of blood lipid
Blood sugar	BMI	Total cholesterol	Sterilization hand cleaner
Blood oxygen	Uric acid	Waist to hip ratio	12 Lead ECG test
Urine routine	Hemoglobin	Body Temperature	
Body Composition Analysis	Ultraviolet sterilization lamp		

Product Features

- 01 High speed, 1 minute measurement
- 02 Moderate height, integrated design, natural sitting posture measurement, adjustable seat height, adopt tunnel-type blood pressure measurement
- 03 High precision, using the most advanced measurement equipment, Ensure measurement accuracy
- 04 Intelligent, support ID/barcode login, full voice guidance

Application:

Hospitals, social health service stations, physical examination centers, smart elderly care, health management institutions, pharmacies and pharmaceutical companies, insurance, fitness center.

Model	IN-E6		
Height measurement	Measurement method		
	Reading mode	Non-contact ultrasonic measurement of human body height	
	measuring range	The main screen displays directly.	
	measurement accuracy	90cm ~ 200cm	
Weight measurement	Measurement mode	± 0.5cm	
	Reading mode	Automatic induction measurement of human body scale	
	measuring range	Equipment display screen display	
	allowable error	1Kg ~ 500Kg	
Measurement of body temperature	Accuracy grade of weight	± 0.1Kg	
	Operating ambient temperature	10 ~ 40°C	
	storage temperature	0 ~ 50°C	
	relative humidity	≤85%	
	Human body temperature measurement mode	32.0 ~ 42.5°C	
	Environmental temperature measurement mode	0 ~ 100°C	
	Precision	≤ ± 0.3°C	
	measure a distance	5 to 8 cm	
Body fat measurement	automatic shut-down	About 15 seconds	
	Measurement parameter	Body fat percentage, body fat amount, body water percentage, muscle mass, Body water content, visceral fat grade, defatted body fat, ideal body weight, inorganic salts, protein, basal metabolic rate and other parameters.	
	Measurement method	Eight electrode/impedance measurement method	
	Electrical impedance output of human body	Support printout of human impedance value	
Body fat measurement	Measuring range	Pressure (0 ~ 300) mmHg [(0 ~ 40)kpa] Pulse rate: 30 times/min~200 times/min	
	Measurement accuracy	Pressure within ± 2mmHg (± 0.267kpa) Pulse rate within ± 2%	
	Applicable Circumference Range of Cuff	17cm ~ 42cm	
Blood oxygen measurement	sensor	Dual-wavelength light-emitting diode	
	wavelength	Red light: 663nm, infrared light: 890nm	
	Measuring range	35% ~ 100%	
	Maximum average optical output power	≤2mW	
	Measurement error	In the range of 70% to 100%, the measurement error is ± 2% (% is pulse oxygen saturation and percentage)	
	Accuracy	Less than 3% in the measuring range of 70% ~ 100%	
	Pulse rate measurement error	30 ~ 250bpm, The monitoring error is ± 2bpm or ± 2%, whichever is the largest	
UV sterilization lamp	Material	T5/T6 quartz glass tube	
	Principles of Disinfection and Sterilization	Shortwave ultraviolet (UVC) ≤280nm, It has powerful energy to penetrate the DNA chemical bonds of germs, causing germs to inactivate	
	Urine routine	Test data	PH (pH), urine specific gravity (SG), urobilinogen (URO), Occult blood (BLD), white blood cells (WBC), urine protein (PRO), Urine glucose (GLU), bilirubin (BIL), ketone body (KET), Urine red blood cell (RBC), urine color (COL)
	Waist to hip ratio	Measuring waist and hip value with a soft ruler	
	12-lead ECG measurement	Input circuit	Defibrillation protection input
		Acquisition mode	12-lead simultaneous acquisition
		Interface display	The interface display color can be adjusted
		Display and print format	12 × 1, 6 × 2, 6 × 2+1R, 3 × 4, 3 × 4+1R, , 3 × 4+3R
		Export format	PDF/JPEG/XML
Four measurements of blood lipids	sample	Detection time	Within 100s (4 items)
			Whole blood, serum, plasma are acceptable
	blood lipids	Detection principle	Enzymatic method, reflectance photometry
		Measurement items	High-density lipoprotein, low-density lipoprotein, triglycerides, total cholesterol
		Specimen volume	No more than 50 μl
			Chol 2.59–10.36;
	Hemoglobin test	Measuring range (Unit mmol/L)	HDL 0.39–2.59; TRIG 0.57–5.65; GLU 1.11–33.3
		Specimen	Fingertip microvascular whole blood
		Detection time	8 seconds
		Equipment detection range	7.0–26.0g/dL(4.3–16.1mmol/L) ; 21–78% Hct
blood sugar, Uric acid, Total cholesterol	Sample volume	1uL	
	Specimen	Fingertip microvascular whole blood	
	Detection time	Within 10 seconds(blood sugar); 26 seconds (total cholesterol); 15 seconds (uric acid)	
	Measuring range	Blood sugar: 20–600mg/dL (1.1–33.3mmol/L)	
		Uric acid: 3–20mg/dL (0.18–1.19mmol/L)	
	Sample volume	Total cholesterol: 100–400mg/dL (2.59–10.35mmol/L)	
		Blood sugar 0.9uL, total cholesterol 10uL, uric acid 1uL	
Sterilization Hand Washer	Smart sensor, 2.2L large capacity		
	21.5 inch extra large touch screen		
	Equipment built-in 50mm thermal printing		
	Support RJ45 and WIFI data upload function		
	AC 100 ~ 240V 50 ~ 60HZ		
	<60VA		

Intelligent Integration Of Chronic Disease Management Platform

Items

Features

- 01 Highly integrated, one-piece design
- 02 Identification to establish electronic health records of residents
- 03 Intelligent Collection of Physical Examination Data
- 04 Data upload
- 05 Storage of measurement data
- 06 Extra-long usage time
- 07 Follow-up management
- 08 Chinese Physical and Psychological Tests

Application:

Hospitals, social health service stations, physical examination centers, smart elderly care, health management institutions, pharmacies and pharmaceutical companies, insurance, fitness center.

Product Function Display

1 Population Health Management
Doctors' home visits, family health check-ups, ageing in place

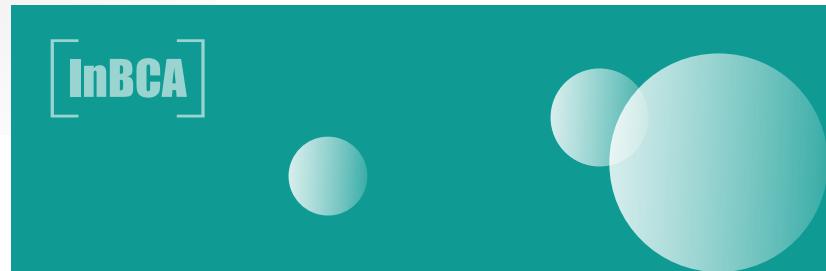

2 Chronic Disease Management and Follow-up
Long-term follow-up and intervention for people with chronic diseases such as hypertension and diabetes mellitus

3 Helping the hierarchical diagnosis and treatment
Permanent electronic records, multimodal health interventions, chronic disease management

4 Public health services
Community/rural doctor follow up, public health screening and control

[InBCA]

Professional Height & Weight Physical Examination

Items

Weight

BMI

Height

Functions

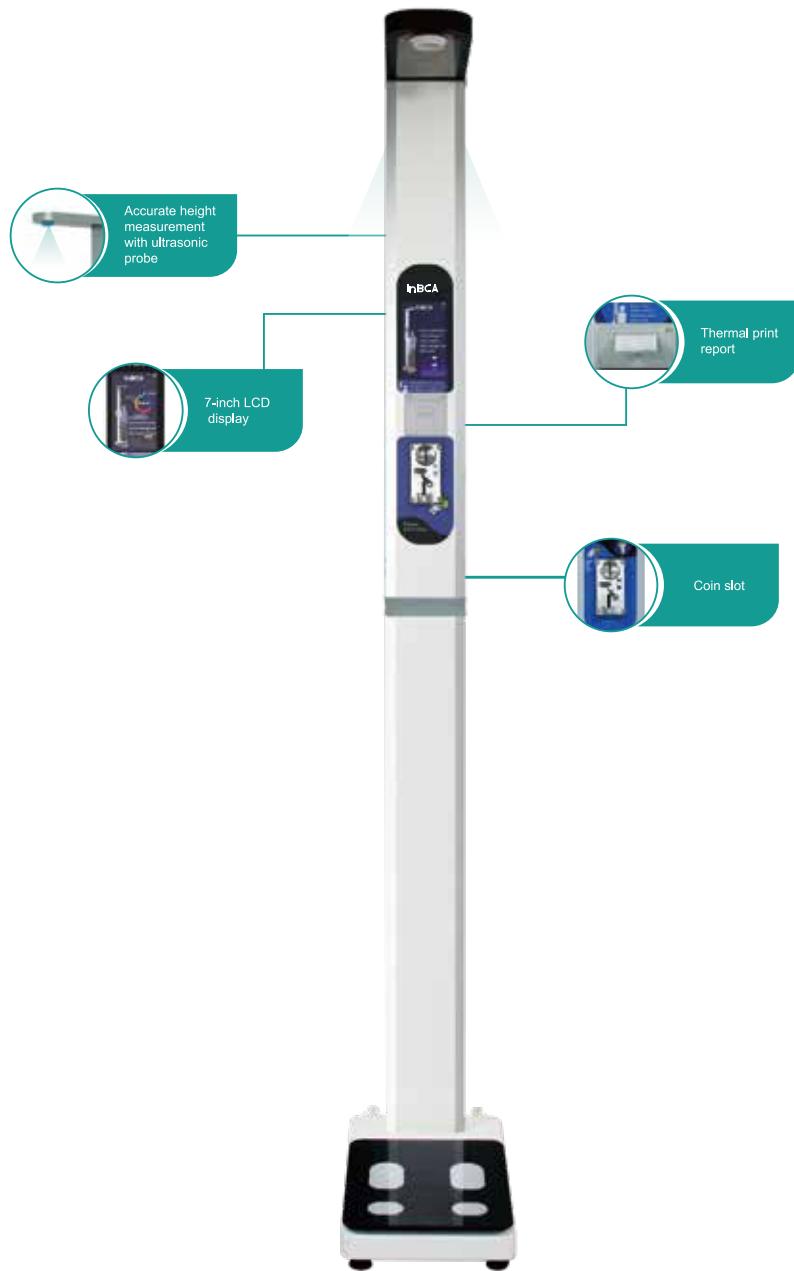

- 01 Light and simple design, three-part folding , with movable wheels, to meet various medical examination demands
- 02 Support thermal printing function
- 03 It can be expanded to one or two-dimensional code scanning, which is suitable for matching medical examination data and identity
- 04 Can expand to WIFI, support wireless connection to HIS or LIS system
- 05 High-precision height and weight measurement to meet medical-level medical examination applications
- 06 7-inch IPS LCD screen, ultra-wide viewing angle
Support thermal printing function

Application:

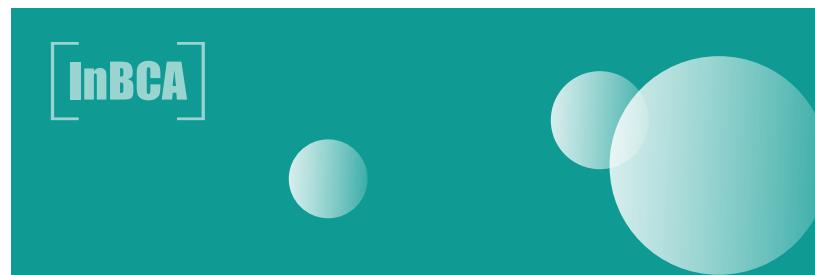

Hospitals, social health service stations, physical examination centers, smart elderly care, health management institutions, pharmacies and pharmaceutical companies, insurance, fitness center.

PRODUCT FUNCTION DISPLAY

SPECIFICATIONS

Module No	IN-H3
Display screen	7 inches touch LCD screen
Height measurement	Ultrasonic probe (US brand)
Weight measurement	Parallel beam type weighing sensor
Measurement range of height	Height: 50 -200cm
Measurement range of weight	Weight: 1-300kg(500kg is optional)
BMI	Automatic display
Deviation of height	Height: $\pm 0.1\text{cm}$
Deviation of weight	Weight: $\pm 100\text{g}$
Coin acceptor	Support most countries' coin or game coin
Peak power consumption	<30W
Standby power consumption	<8W
Working temperature/humidity	10-40°C 20-95%
Net weight/package weight	20kg/30kg
Height of machine	229cm(Height could be customized)
Scale body folding dimension	1152*229.2*179.4mm
Basefoot dimension	310*520*100mm
Package dimension	396 *610 *1260 mm (1 pcs/ carton)
Packing size	Carton: Outer box dimensions (length, width and height): 39.6*61*126cm, Net weight: 25kg, Gross weight: 27kg

Multifunctional Body Fat Analyser

INBCA multi-functional body fat analyser, with accurate measurement, strong stability, rapid measurement of multiple test items, can meet the hospital physical examination items, easy to connect with the hospital software system, and supports RS232 to transfer data.

Items

Weight

BMI

Height

Body Composition Analysis

Functions

01 Ultrasonic height sensor for height measurement

02 Accurate weight sensor with deviation at 100g

03 Coin acceptor for log in options

04 LCD display for clear information

05 Inbuilt printer with automatic result ticket

06 Thermal printing

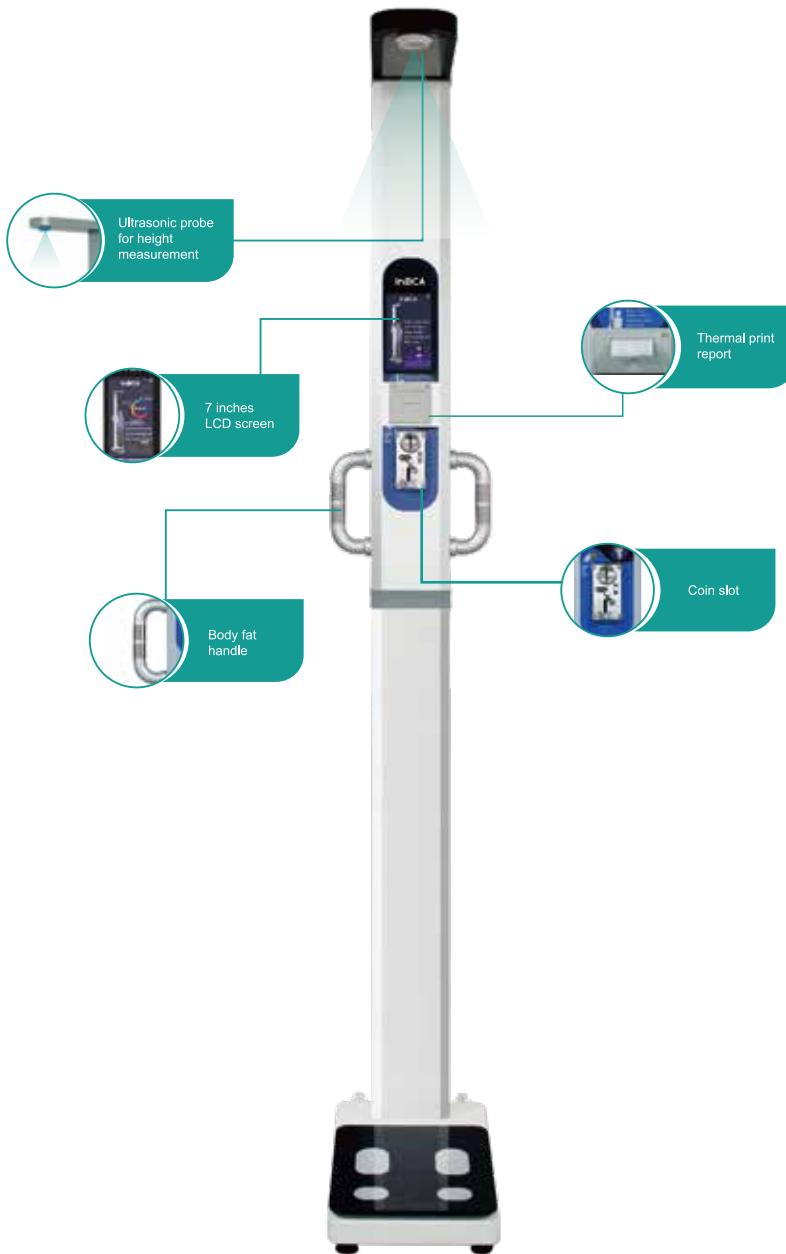

07 Voice announcement

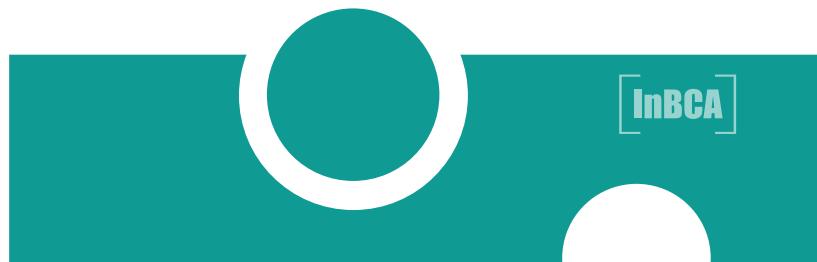

Application:

Hospitals, social health service stations, physical examination centers, smart elderly care, health management institutions, pharmacies and pharmaceutical companies, insurance, fitness center.

Module No	IN-H9
Display screen	7 inches touch LCD screen
Height measurement	Ultrasonic probe (US brand)
Weight measurement	Parallel beam type weighing sensor
Measurement range of height	Height: 50-200cm
Measurement range of weight	Weight: 1-300kg(500kg is optional)
BMI	Automatic display
Bodycompositionanalysis	Four-electrode,dual-frequency, bio-impedancemeasurement
Measuring current	Below 90μA
Deviation of height	Height: ±0.1cm
Deviation of weight	Weight: ±100g
Coin acceptor	Support most countries' coin or game coin
Peak power consumption	<30W
Standby power consumption	<8W
Working temperature/humidity	10-40°C 20-95%
Net weight/package weight	20kg/30kg
Height of machine	229cm(Height could be customized)
Scale body folding dimension	1152*229.2*179.4mm
Basefoot dimension	310*520*100mm
Package dimension	396*610 *1260 mm (1 pcs/ carton)
Packing size	Carton: Outer box dimensions (length, width and height): 39.6*61*126cm,Net weight: 25kg, Gross weight: 27kg

Intelligent Integration Of Chronic Disease Management Platform

**Items**

Height

weight

BMI

Body Temperature

Blood pressure

Body Composition Analysis

Blood oxygen

Features

01

All-in-one machine design, various physical examinations are completed in one stop

02

Multiple login methods

03

Quickly and easily establish personal health electronic records

04

Simple operation and immediate printing of physical examination report

05

Powerful Internet function to effectively prevent chronic diseases

**Application:**

Hospitals, social health service stations, physical examination centers, smart elderly care, health management institutions, pharmacies and pharmaceutical companies, insurance, fitness center.

Model	IN-H9-2	
Height	Hardware module model	INBCA Hardware motherboard + sensor
	Measuring system	Ultrasonic sensor (including high-precision temperature difference compensation sensor)
	Measuring range	Height:70~210cm
	Measurement accuracy	$\pm 0.1\text{cm}$
weight	Hardware module mode	INBCA Hardware motherboard + sensor
	Measuring system	Precision balance beam pressure sensor
	Measuring range	1~500Kg
	Measurement accuracy	$\pm 0.1\text{Kg}$
Body composition analysis	Measuring system	DSM-BIA (Direct Segmental Multi-frequency Bioelectrical Impedance Analysis)
	Measuring range	50KHz/100KHz
	Measuring current	Below 90 μA
	Electrode material	Plated metal material
	Measuring part	Trunk / Right arm / Left arm / Right leg / Left leg
	Measuring range	50.0 Ω ~ 1200.0 Ω
Blood pressure	Measuring system	Measuring system
	Measuring range	0 ~ 299mmHg, 40 hops/min ~ 180 hops/min
	Measurement accuracy	Pressure: within $\pm 3\text{mmHg}$ ($\pm 0.4\text{kpa}$), pulse reading: within $\pm 2\%$ of reading
	Applicable arm circumference	17cm~42cm
Blood oxygen	Measuring system	Dual wavelength light emitting diode
	Measuring range	35%~100%
	Measurement error	Within the range of 70%~100%, the measurement error is $\pm 2\%$ (% is pulse oxygen saturation and percentage)
	Measurement accuracy	Less than 3% within the measurement range of 70%~100%

Coin-operated blood pressure monitor

Items

Blood pressure

Features

- 01 Using Panasonic arm barrel type professional blood pressure to ensure accurate measurement
- 02 Equipped with intelligent pressurization technology, automatically adjust pressurization pressure
- 03 5-inch LCD touch screen, convenient data display
- 04 Voice and picture prompts , making the operation easier
- 05 Support multiple expansion functions such as coin operated and thermal printing

Application:

Hospitals, social health service stations, physical examination centers, smart elderly care, health management institutions, pharmacies and pharmaceutical companies, insurance, fitness center.

Model	IN-I1
Measuring range	Static pressure measurement range: 0~280mmHg Pulse measurement range: 30~160次/分 Systolic blood pressure range: 60~230mmHg Diastolic blood pressure range: 40~130mmHg
Accuracy	Maximum error of static pressure indication: $\pm 3\text{mmHg}$ Pulse error: $\pm 5\%$
Display screen	5.0 inch LCD touch screen, 65K colors
Operation tips	Voice and picture prompts
Measurement methods	Oscillographic detection method
Upper arm circumference	约20cm~34cm
Blood pressure operation mode	Support continuous operation
voice	Support 2 language voices to switch between each other, can be set through the screen
Printing	58mm thermal printing paper, support change paper quickly and easily Support English printing + other customized language switching
Voice output	Built-in speaker
Coin acceptor	Sample currency comparison style, free to install comparison sample currency
Pressure mode	Pressure adjustment method of diaphragm pump
Pressure detection	Semiconductor pressure sensor
Pulse detection	Semiconductor pressure sensor
Quick exhaust method	Rapid exhaust valve opening method
Working environment	Temperature: 5~40° C, relative humidity: 15~80%
Power supply	AC100~240V 50~60Hz, DV 12V, 20W
Packing size	Wooden box: Outer box dimensions (length, width and height): 60cm*42cm*58cm, Net weight: 15kg, Gross weight: 25kg

Electronic wheelchair scale

Items

 BMI	Body Mass Index (BMI)	 Measurement hold	 Automatic measurement	 Fixed peeling	 Default tare	 Save test history
 HIS	HIS system docking	 Anti-skid and vibration damping	 Wireless printing (optional)	 Face recognition (optional)	 QR code/barcode scanning (optional)	

Functions

- 01 Patients can complete measurements while standing, sitting or in a wheelchair, safely and accurately weighing
- 02 The easy-to-read rotating 10.1-inch color LCD touch screen can be turned toward the patient or medical staff, and data on hold function can display the weighing results after the patient leaves the scale.
- 03 Powerful network connection, with wireless network and wired network functions, supports 10/100/1000M adaptive Ethernet, supports wireless 2.4GHz WiFi, and can seamlessly connect to various hospital detection systems.
- 04 Integrated casters make it easy to move this multifunctional scale
- 05 The integrated folding seat allows patients to experience weighing in comfort.
- 06 A variety of different tare weights can be preset, and the weight of the wheelchair or companion can be subtracted through the preset tare function.
- 07 The two-way upward scale ramp design can meet the use scenarios of both one-way and two-way pushing wheelchairs onto the scale;
- 08 Stable double armrests to support standing patients

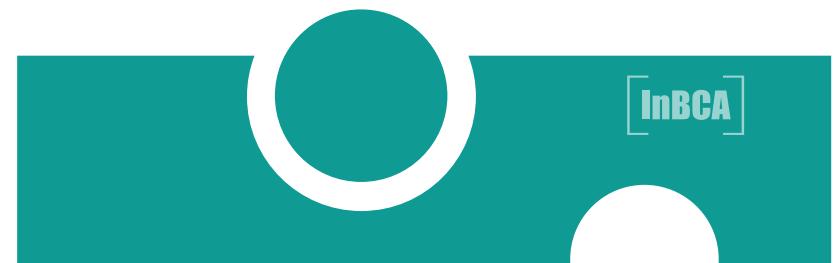

Application:

Hospitals

Model	IN-685
Maximum weighing	400kg
Calibration graduation value (g)	100g ≤ 200Kg ≥ 200g
Display screen	10.1 inches
Packing size	Carton: Outer box dimensions (length, width and height): 102*126*38cm, net weight: 60kg, gross weight: 100kg Wooden box: Outer box dimensions (length, width and height): 103*127*37cm, net weight: 60kg, gross weight: 104.5kg

Electronic wheelchair scale

Items

Weight

BMI

Functions

A/D conversion, high readability.

Convenient to call internal code display, alternative to sense weights.

Observe and analyse the tolerance.

Zero tracking range, zero setting(power on/manual) range can be set separately.

With weighing counting function: single piece weight.

with power failure protection.

Application:

Hospitals

PRODUCT FUNCTION DISPLAY

SPECIFICATIONS

Model	IN-955
Grade	III
Weighing capacity	0-300kg
Input signal	1.0~2.0mV/V
A/D conversion speed	40 times/sec
Bridge voltage	9V/DC
A/D resolution code	300,000
Voltage	220V50HZ

Electronic wheelchair scale

Items

Weight

BMI

Functions

The instrument viewing angle is
adjustable for easy viewing

4 transport tires with brakes

Foldable foot pedals, which are very
close to the ground when folded

Foldable armrests

Application:

Hospitals

Model	IN-956
Display	25mm digital LCD display
Range	250KG
Structure	ABS plastic display
Division value	2500e
ADC	$\Sigma - \Delta$
ADC refresh rate	$\leq 1/10$ 秒
